MISSION-CONTROL

micro:bit V2

Call. Command. Control.

FaceTime + Game Controller + walkie-talkie.

Classroom-ready P2P video + D-pad. No server. No account.

Get started in 60 seconds

1. Open the page on two devices.
2. Type the same room code on both.
3. Press Start camera — allow permissions.
4. Press Connect — host + guest link up.
5. D-pad, text, TTS, or bridge a micro:bit.

P2P video
Two browsers, one room code, live video and audio. Chrome / Edge.

D-pad control
Send UP / DOWN / LEFT / RIGHT / STOP across the room or across the world.

micro:bit bridge
Optional — forward D-pad commands to a BBC micro:bit V2 over BLE UART.

abourdim.github.io/mission-control

For teachers, tiny astronauts, and makers.
Every astronaut started by asking "how do I talk to the other side?"
